Title of proposed project	Waste management of oil in restaurant and hotels
Deadlines	As soon as possible
Description of project idea incl. theme and activities	<p>The project is aiming at creating a network of partners and to promote exchange of information and good practices among the participating public authorities within the context of producing biodiesel and biomass from the frying oils of the restaurants and hotels.</p> <p>The experience in some EU member states in environmental domains such as renewable energy and specifically biodiesel and biomass will be shared from more mature to less mature countries. The collection, the usage and the end product of such frying oils varies from country to country.</p> <p>The knowledge of biodiesel and biomass production from frying oils as raw material requires more attention in the participant countries and our “learn lessons” will be used in the implementation stage.</p>
Partner consortium (so far)	Municipalities of France, Greece, Italy, Romania, Slovenia, Malta and Sweden.
Further partners being sought	Municipalities of Spain and Slovenia
What are the financial conditions of participation?	The average estimation per project is 1M€
Foreseen project duration	1-3 years
